1 Lexicons, corpora, and evaluation: 1993 benchmark tests for the ARPA spoken language program   ■
David S. Pallett, Jonathan G. Fiscus, William M. Fisher, John S. Garofolo, Bruce A. Lund, Mark A. Przybocki
March 1994 **Proceedings of the workshop on Human Language Technology HLT '94**
Publisher: Association for Computational Linguistics
Full text available: 📄 pdf(1.97 MB)   Additional Information: full citation, abstract, references

> This paper reports results obtained in benchmark tests conducted within the ARPA Spoken Language program in November and December of 1993. In addition to ARPA contractors, participants included a number of "volunteers", including foreign participants from Canada, France, Germany, and the United Kingdom. The body of the paper is limited to an outline of the structure of the tests and presents highlights and discussion of selected results. Detailed tabulations of reported "official" results, and a ...

2 Precise interprocedural dataflow analysis via graph reachability   ■
Thomas Reps, Susan Horwitz, Mooly Sagiv
January 1995 **Proceedings of the 22nd ACM SIGPLAN-SIGACT symposium on Principles of programming languages**
Publisher: ACM Press

Full text available: 📄 pdf(1.51 MB)   Additional Information: full citation, abstract, references, citings, index terms

> The paper shows how a large class of interprocedural dataflow-analysis problems can be solved precisely in polynomial time by transforming them into a special kind of graph-reachability problem. The only restrictions are that the set of dataflow facts must be a finite set, and that the dataflow functions must distribute over the confluence operator (either union or intersection). This class of probable problems includes—but is not limited to—the classical separable problems (als ...

3 Applications of simulation in progress reporting and control   ■
Nader N. Chehayeb, Simaan M. AbouRizk
December 1995 **Proceedings of the 27th conference on Winter simulation**
Publisher: ACM Press
Full text available: 📄 pdf(757.63 KB)   Additional Information: full citation, references, index terms

4 An approach to multidimensional data array processing by computer   ■

Mervin E. Muller

February 1977 **Communications of the ACM**, Volume 20 Issue 2

Publisher: ACM Press

Full text available: 🔁 pdf(1.80 MB)   Additional Information: full citation, abstract, references, citings

> Some recent work on the development of general-purpose computer-based statistical and data processing capabilities for handling multidimensional arrays of data is presented. Attention is first given to some of the general problems of multidimensional table and array processing. This is followed by a summary of some recent developments in array processing capabilities at the World Bank, in particular, the system identified as WRAPS (World Bank Retrieval and Array Processing System).

6 A Fortran technique for simplifying input to report generators   ■

J. G. Cleary

June 1966 **Communications of the ACM**, Volume 9 Issue 6

Publisher: ACM Press

Full text available: 🔁 pdf(215.96 KB)   Additional Information: full citation

7 A reporting tool using "programming by example" for format designation   ■

Tetsuya Masuishi, Nobuo Takahashi

January 2000 **Proceedings of the 5th international conference on Intelligent user
                interfaces**

Publisher: ACM Press

Full text available: 🔁 pdf(527.40 KB)   Additional Information: full citation, abstract, references, index terms

> This paper describes a report tool in which report formats are designated by "Programming by Example"-like operations. Users specify a sample layout of an example row of relational table data on a sheet, and select an iteration pattern of the sample layout. The tool extracts a set of general formatting rules from the sample layout. The rules consist of absolute positions of non-iterative data, relative positions of iterative data, the iteration pattern, and the increment of the ...
